

## **Art – Curriculum Intent**

### **Art**

At Northumberland PRU students in Art are offered an engaging, inspiring and challenging curriculum which equips them with the knowledge and skills to experiment, invent and create their own works of art and design concepts. They develop their critical thinking and artistic vocabulary through the analysis of cultural resources and contemporary and historical art work and movements and this informs their own work. A broad range of materials, techniques and processes are introduced, including drawing, painting, collage, printmaking, ceramics and graphic design. Ideas and skills are combined in order to allow students to express their creativity and produce exciting, original outcomes.
